KEY RISKS

6. WHAT ARE THE KEY RISKS ASSOCIATED WITH THIS PRODUCT?

General risks associated with the Fund

Credit risk – Credit risk relates to the creditworthiness of the issuers of the Islamic money market instruments and Islamic deposit and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the Islamic money market instruments and Islamic deposit placement. In the case of rated Islamic money market instruments, this may lead to a credit downgrade which will in turn adversely affect the value of the Islamic money market instruments. This could adversely affect the value of the fund.

Liquidity risk – This risk occurs during periods of unexpected high redemption by unitholders. If a fund needs to liquidate a relatively large amount of fund's existing underlyings, the act itself may depress the value of the fund due to potential interest loss, which may subsequently lead to investment loss to its unitholders.

To mitigate liquidity risk, The Fund is managed in such a way that maturities of Islamic cash deposits and Islamic money market instruments are adequately diversified across a broad range of tenures to meet potential redemptions without having to resort to early termination of placements that could potentially result in profit rate losses. We may (in consultation with the Trustee) seek temporary financing to meet redemption request, considering which is in the best interests of unitholders before we consider the suspending the dealing in the Fund's units. Please refer to Section 6.9 Suspension of Dealing in Units in the prospectus for more details.

Inflation or purchasing power risk – This risk refers to the effect of inflation or loss of purchasing power on the value of investment returns and the worth of the investment itself. Investors' returns from the Fund may not keep pace with inflation and hence reduce their purchasing power.

Reinvestment risk – This is a risk that future proceeds (profit and/or capital) are reinvested at a lower profit rate. Reinvestment risk is especially evident during periods of falling rates where the profit payments (from existing placements) are reinvested at less than the profit rate at the time of placement. To mitigate this risk, the Manager would seek to place Islamic cash deposits with licensed financial institutions offering competitive profit rates.

Specific risks associated with the Fund:

Early termination of Islamic cash deposits risk – This is the risk of the Fund having to terminate/withdraw from placements in Islamic cash deposits before the maturity date of the respective placements – due to redemptions from the Fund. As a result of the premature termination of placements, there will be a loss of a percentage or even all of the profits accumulated during the period of holding of the Islamic cash deposits, resulting in loss of income to the Fund. To mitigate this risk, the Manager anticipates the potential percentage of the Fund that may experience redemptions and allocates maturities accordingly. For example, the Manager may ensure that there are sufficient tranches of Islamic cash deposits maturing weekly to meet any potential redemptions from the Fund.

Interest rate risk – This risk refers to the effect of the changes in the interest rate environment which may negatively impact the performance (e.g., profit rate) of the Fund. In the rising interest rate environment, prices of Islamic money market instruments will generally decrease and vice versa. The interest rate is a general indicator that will have an impact on the management of Fund regardless of whether it is an Islamic fund or otherwise. It does not in any way suggest that the Fund will invest in conventional financial instruments. All the investments carried out for the Fund are in accordance with Shariah requirements.

Shariah non-compliance risk – This risk refers to the possibility that the Fund not conforming to Shariah requirements. The Manager (as advised by the Shariah Adviser) would be responsible for ensuring that the Fund is managed and operated in accordance with Shariah requirements. Any Shariah non-compliant investment made by the Fund due to error of the administration shall be withdrawn or disposed of with immediate effect, if possible, or otherwise within one (1) calendar month of knowing the status of the investment. Any gain resulting from the said withdrawal or disposal shall be channeled to *baitulmal* and/or charitable bodies as advised by the Shariah Adviser whilst any loss is to be borne by the Manager.

Shariah status reclassification risk - This risk refers to the risk of a possibility that the currently held Islamic deposits or Islamic money market instruments invested by the Fund may be declared as Shariah non-compliant by the relevant authority or the Shariah Adviser. If this occurs, the Manager will take the necessary steps to withdraw or dispose of such Shariah non-compliant instruments.

The investment manager exercises diligence in minimising the above risks to the Fund. However, it is not always possible to cover all investment risks in spite of best efforts as financial markets can be highly unpredictable. Investors are encouraged to consult their advisers such as financial/tax consultants, lawyers or bankers for a further understanding of these risks.

Note: If your investments are made through an institutional unit trust scheme adviser ("IUTA") which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed of the Fund and as a result, you may not exercise all the rights ordinarily conferred to a Unit Holder (e.g. the right to call for Unit Holders' meetings and the right to vote at a Unit Holders' meeting). Accordingly, the Manager will only recognise the IUTA as a Unit Holder and the IUTA shall be entitled to all the rights conferred to it under the deed of the Fund.
